

Day 7

Database and php connection

Code:

```
<?php
    $host = "localhost";
    $username = "root";
    $passwd = "";
    $dbname = "db_intenship";

    $connection = mysqli_connect($host, $username, $passwd,
    $dbname);

    if ($_POST) {
        $name = $_POST['name'];
        $gender = $_POST['gender'];
        $mobile = $_POST['number'];

        $q = mysqli_query($connection,
            "insert into tbl_data(ht_name,ht_gender,ht_mobile)
            values('{ $name}','{ $gender}','{ $mobile}')" or die("Error".
            mysqli_error($connection));

        if($q){
            echo "<script>alert('Record Added');</script>";
        }
    }
}
```

?>

<!DOCTYPE html>

<html>

<head>

<meta charset="utf-8">

<title> Add To Database </title>

</head>

<body>

<form method="post">

Name : <input type="text" name="name" />

Gender : <select name="gender"><option
value="Male">Male</option>

<option value="Female">Female</option></select>

Mobile : <input type="text" name="number" />

<input type="submit" />

 View Records

</form>

</body>

</html>

Output:

Browser tabs: Add To Database, (1) WhatsApp

Address bar: localhost/connection.php

Navigation: Apps, YouTube Download...

Name : Gender : Male Mobile : [View Records](#)

Browser tabs: Add To Database, +

Address bar: localhost/connection.php

Navigation: Apps, YouTube Download...

Name : Gender : Male Mobile : [View Records](#)

Browser tabs: localhost/connection.php, (1) WhatsApp

Address bar: localhost/connection.php

Navigation: Apps, YouTube Download...

localhost says
Record Added
